

OUR ENVIRONMENT OUR FUTURE

EMBRACE ALTERNATIVES TO PLASTICS / KAVEERA

Wooven baskets Carriers

Paper bags

Cloth bags

Kaveera / plastics are harmful to the environment:

- Kaveera like other plastics, does not decompose for several years (over 1000 years)
- Kaveera kills livestock
- Plastic wastes block gutters and waterways, causing flooding in cities.
- Burning of Kaveera and other plastics causes cancer.

Manage your waste wisely

- Avoid open burning of plastics/kaveera
- Do not light cooking stove using Kaveera or plastics
- Do not package hot foods in Kaveera
- Do not litter kaveera/plastics
- Subscribe to waste collectors
